Dear Ms. Marzavan,

I am applying for the position of Lecturer in Framing by Design (Part Time) at Forward College's Lisbon campus, starting January 2026.

I am a Senior UI/UX Designer with over ten years of experience in design thinking, ethnographic research, and design sprints, working with agencies including Wunderman Thompson, AKQA, and Meta Design, as well as early-stage startups across Europe and the US. Throughout my career, I have facilitated design thinking workshops for cross-functional teams, guiding them through the same process this course teaches: questioning assumptions, conducting research, and reframing a problem before jumping to solutions.

I am drawn to this role because framing is central to how I already work as a designer, and I would welcome the chance to teach it. I am also comfortable using AI as a co-tutor, and the flipped classroom model matches how I already facilitate: guiding discovery rather than lecturing.

I am based in Lisbon, hold the right to work in Portugal, and am available for the full term, including tutoring sessions, bi-weekly debriefs, and the end-of-term showcase.

Thank you for considering my application. I would welcome the chance to discuss how my experience could contribute to the Framing by Design course.

Kind regards,
Ana Paiva
